LETTER OF RECOMMENDATION

It gives an immense pleasure to put forth my recommendation for Ms. Nikhitha P, for an MS in Computer Science at your esteemed university, based on my understanding of her skills and abilities which I have noticed during her under-graduation studies. I found her to be a student with a clear vision regarding her goals and ambitions.

She is an intelligent, sincere and conscientious student and has maintained a good academic record in all the courses. She has been one among the few students who completed their assignments before time with optimal results. Her performance can be attributed to her clear concepts and strong fundamentals, which have always enabled her to grasp new ideas and topics with relative ease. Data Structures, Sorting and Searching are important tools which form the foundation of programming languages and she handled these concepts quite well. Ms. Nikhitha comes up with innovative ways of applying her concepts as she did while doing a project in fourth year based on Network Security.

Along with her studies, she always stood out as a person with excellent leadership and interpersonal skills which was evident during the college's annual fest "Acharya Habba". Also during the departmental fest "Lakshya" where she organized several events. She was also a prominent volunteer for coordinating college Placement Cell.

She clearly has the skills and talents necessary to succeed in this Master's program, but I think it's her genuine interest in and passion for computer science and desire to improve human life with software applications that will enable her to excel. She has always impressed me with her recognition of the need for and her desire to design computer applications of the next generation.

Again, I have no doubt that Nikhitha will excel in her Master's program and recommend her highly. I think she will make a great contribution to your school and I'm very much looking forward to seeing and experiencing the contributions she will make in the field of Computer Science. Please feel free to contact me if you have any questions regarding this recommendation.

Department of Computer Science & Engg

Acharya Institute of Technology,

Soldevanahalli, Bangalore-560 107

 **Recommender Name:** Dr. V NAGAVENI

Professor – Computer Science & Engineering
